	Urgent	Not Urgent
Important	Do (Your MVP) ● Accept input from command line to search API ● Find card price from API data ● Display in command line to user	Schedule (for V 2.0) ● Show if price has gone up or down in certain timeframes ● Make wishlist of cards with current prices ● Combine schedule 1 and 2 for recommended times to buy cards
Not Important	Delegate (Use a library) ● Use API with card information (looking at tcgapi.dev rn) ● Use curl to fetch requests ● Use scanner for user inputs	Delete (Cut it) ● Graphical UI ● Add cards to a collection ● Networking with other users
